

Workshop Técnicas Quirúrgicas en ratón de laboratorio- Workshop on Surgical Techniques in the Laboratory Mouse - Centre d'Expérimentation Fonctionnelle, Faculté de Médecine Pierre et Marie Curie, Paris, France
June 24 - 27, 2014

The Jackson Laboratory and Centre d'Expérimentation Fonctionnelle have teamed together to offer a Workshop on Surgical Techniques in the Laboratory Mouse. This four-day intensive hands-on workshop is for those wishing to obtain practical training in surgical techniques for the laboratory mouse.

A wide range of surgical procedures are taught including:

castration

vasectomy

nephrectomy

5/6 nephrectomy

Kidney capsule implantation

adrenalectomy

splenectomy

thymectomy

ovariectomy

ovarian transplantation

jugular vein catheterization

carotid artery catheterization

In addition to surgical procedures, topics covered include aseptic surgical techniques, necropsy and injection techniques. Participants should have some basic surgery knowledge and the ability to work under a dissecting microscope.

Organizers and Instructors:

Jennifer Corrigan, M.S., The Jackson Laboratory, Bar Harbor, Maine, USA

Andree Lapierre, B.S The Jackson Laboratory, Bar Harbor, Maine, USA

Bonnie Lyons, D.V.M., The Jackson Laboratory, Bar Harbor, Maine, USA

Serban Morosan, D.V.M., Ph.D, Centre d'Expérimentation Fonctionnelle, Paris, France

Registration:

Registration Fee: \$2500 US Dollars (Space is limited to 12, so early registration is suggested)

Registration fee includes workshop materials only. Attendees are responsible for their own meals and lodging for the duration of the event.
