| Título del Proyecto | Development of the European portal of rare diseases and orphan drugs - ORPHANET |
| Nº de expediente asignado | Agreement nº: 2010-22-06 |
| Abstract | ORPHANET main objective is to provide the community at large with an inventory of RD, an encyclopaedia in as many languages as possible, and a directory of expert services in the participating countries. The project is to improve the update of the encyclopaedia and the update of the directory of services, to put in place a process to ensure swift management of translations, swift collection of data and validation by national health authorities before publication. The project is also to establish the governance that Orphanet deserves to ensure its mission at international level. The website will be adapted to offer national front pages in national language(s), and the possibility to disseminate information on national policy documents and national events. Each Member State will benefit from the core infrastructure already developed and will have the opportunity to offer its citizens a national portal at a marginal cost. All the collected information will serve as a source to map health care services in Europe and to build indicators. |
| Entidad Financiadora | European Union - European Agency for Health and Consumers (EAHC) |
| Convocatoria: | EU Health Programme 2008-2013 |
| Importe de la ayuda | 126.078,23€ |
| Fechas de ejecución del proyecto | 01/04/2011-31/03/2014 |
| | <i>This project has been funded by the European Commission through its Public Health and Consumer Protection Directorate (DG SANCO), PHEA programme</i> |
