

CAIXAIMPULSE VALIDATE 2020

With the CaixaImpulse Programme, La Caixa aims to promote the creation of services, products, or businesses in the area of Life Sciences through the transformation of scientific knowledge into services, products, or businesses that create value for society, reducing existing barriers and facilitating access to markets, contacts, and key knowledge.

- For the **Projects** ([see the list in page 8 of the call](#)):
 - Projects must **be aimed** at the **valorisation** and **commercialisation** of the protected or protectable Assets resulting from research.
 - Projects must be related to the areas of **Life, Medical and Health Sciences**.
 - May or may not have a patent or utility model or other IP (intellectual/industrial) registration pending. Should the IP registration be sought at a later stage, the protection of the Assets may be included in the Valorisation Plan and budget, and in that case the patent, utility model, or IP right to be registered must be applied for within the 15-month term granted to implement the value development actions of the Valorisation Plan.

- For the **Beneficiary** of a Valorisation Grant:
 - They must be the **owner or co-owner of the protected or protectable Assets** resulting from the research and subject of the Valorisation Plan.
 - One same Beneficiary may complete more than one application provided that they are associated to different protected or protectable Assets resulting from different research projects. **Projects may be submitted by a consortium of Centres from all H2020 Regions.**

- For the **Project Leaders**:
 - The **Project Leader will lead the Valorisation Project** and the development of the actions approved in the Valorisation Plan. The Project Leader must be fully committed to the Project.
 - The Project Leaders may or may not be the leader of the research project that generated the Assets.
 - The Project Leader will require the agreement of the Beneficiary to be able to submit the application.

The amount of the grant to be requested is between **€50,000** and **€100,000**:

Selection Criteria

The **Quality of the Science** and the Asset (25%)

The **Market** potential of the Assets (24%):

The **Valorisation** Project (15%)

The **Transfer** and **Implementation** capacity (24%)

The **Social and responsible innovation potential** (12%)
