

Charles River's 6th European Short Course on Laboratory Animal Science

The 6th European Short Course on Laboratory Animal Science, organized by Charles River, will be held February 8-10, 2012, in Brussels, Belgium.

This event is a unique opportunity to meet new people within the laboratory animal field and to exchange ideas and information. The course lasts for three days and is designed to update the biomedical research community on current trends and technological advances in this field.

The course is broken into tracks that include 27 topics presented by members of Charles River's professional staff as well as guest speakers.

Attendees can go to the topics of their choice, and there is no need to sign up for a particular track. All attendees will receive a Certificate of Attendance for their course hours that may apply to Continuing Education credits.

The final programme is now available. [Click here](#) to download it.
